How Diphtheria is Contracted.
One often hears the expression, "My child caught a severe cold which developed into diphtheria," when the truth was that the cold had simply left the little one one particularly susceptible to the wandering diphtheria germ. If your child has a cold when diphtheria is prevalent you should take him out of school and keep him off the street until fully recovered, as there is a hundred times more danger of his taking diphtheria when he has cold. When Chamberlain's Cough Remedy is given it quickly cures the cold and lessens the danger of diphtheria or any other germ disease being contracted.
